PROFESSIONAL SUMMARY

Data Scientist with 3+ years of experience across learning analytics, machine learning, and technical leadership in global EdTech. Track record of building learner-analytics systems at scale (24,000+ learners), designing evaluation frameworks, and using data to drive measurable programme outcomes — including recovering wrongly-failed learners from a grading-pipeline bug and lifting a programme's graduation rate past target, and currently building an independent portfolio of end-to-end ML and MLOps projects on real-world data and targeting remote-first Data Science and ML Engineering roles globally.

EXPERIENCE

Data Scientist – Technical Mentor Jan 2025 – Present

ALX Holdings Limited / ALX Tech Nig Limited (ALX Africa) · Remote

- Transitioned from independent contractor to full-time employee under ALX's Nigerian entity, continuing ownership of learner analytics, reporting dashboards, and technical mentoring at programme scale.
- Carried the Portfolio Project Repository and the redesigned Machine Learning Portfolio Evaluation framework through rollout, and contributed technical evaluation criteria to the AI Engineer Hiring Framework.
- Supporting ALX's transition to self-paced learning, including a new KPI and feedback framework for the self-paced Office Hours model.
- Analysed cross-cohort performance data for 9,000+ learners across 6 cohorts and isolated an autograder fault suppressing graduation outcomes by up to 14%; recovered 86 wrongly-failed Machine Learning learners (100% recovery) and manually corrected 1,163 assessment records across 286 learners.
- Designed and shipped 7 learner-support frameworks (including Tiered Support and a Reset & Rejoin process) and independently led 5 operational systems, including a Technical Metrics Framework and a Mass Issue Detection Protocol.
- Built and maintained reporting dashboards (Graduation Tracker, Cities Dashboard, Weekly Performance Tracker, and others) used by programme managers and executives; maintained 90%+ average learner CSAT.
- Authored the business case, governance model, and executive presentation for a centralised Portfolio Project Repository, and redesigned the Machine Learning Portfolio Evaluation into a reusable multi-cohort scoring framework.

Head Technical Mentor Apr 2024 – Jan 2025

SAND Technologies · Remote

- Led technical mentoring operations across Data Analytics, Python, Machine Learning, Data Science and Data Engineering programmes supporting 24,000+ enrolled learners, including 10,764 Data Analytics, 759 Python, 549 Machine Learning and 472 Data Science graduates.
- Drove learner activation to 94% against a 70% organisational baseline, and lifted the Data Science programme's graduation rate from 69.92% to 76%, surpassing the 70% target.

Data Science Tutor Aug 2023 – April 2024

ExploreAI Academy · Remote

- Delivered live Data Science and Machine Learning instruction via webinars and Office Hours, and provided one-on-one technical support to over 5000+ learners, achieving a Graduation rate of 78%, a CSAT score of 91%, and an NPS score of 883%.
- Assessed learner work and provided structured feedback on Python, ML algorithms, statistical analysis, and data pipelines.

IT Instructor & Network Administrator Jan 2018 – Dec 2023

RubyFoot Connect Integrated Ltd. · Nigeria

- Trained 3,000+ learners in computer hardware maintenance and networking; administered 1,000+ exams as a certified Pearson VUE Test Administrator.

EDUCATION

B.Sc. Physics (Honours) — GPA: 4.00 / 5.00 Jul 2007 – May 2012

University of Jos · Jos, Nigeria

SKILLS

Languages: Python, SQL | ML / DL: scikit-learn, XGBoost, TensorFlow, PyTorch, SHAP | Cloud: AWS

Deployment: FastAPI, Streamlit, Docker | Analytics & BI: Power BI, Looker Studio, Google Sheets, Matplotlib, Seaborn

CERTIFICATIONS

[Machine Learning Specialization](#) — DeepLearning.AI · Stanford University — Sep 2024

[Statistics with Python](#) — University of Michigan — Jul 2024

[Machine Learning Professional Certificate](#) — IBM — Mar 2024
